#1 OPIATE WITHDRAWAL SUPPLEMENT

ELIMIDROL PROVIDES THE RELIEF YOU NEED FROM THE FIRST DOSE

With You From Day One

Elimidrol is a scientifically formulated opiate detox supplement engineered to provide you with the powerful relief you need to overcome opiate withdrawal.

“I just want to thank whoever created Elimidrol as you saved my life! The relief that it provided me was truly beyond words. I really don't know how to thank you enough.”
 -Travis from New Jersey

Opiate withdrawal is a challenging and complicated problem. It often dominates your life and threatens your future. The intense discomfort caused by withdrawal makes it difficult for many to continue, or even begin, their path to sobriety. Opiate withdrawal is physically and mentally overwhelming and that is why Elimidrol is here to help.

With Elimidrol you are not alone. Elimidrol provides the support you need to begin your journey, regain your life, and take back your future.

It is time to give your life free from the restraints of opiate withdrawal.

Reclaim Your Life Today

Many opiate withdrawal treatments on the market today come with the risk of an addiction. Elimidrol is non-addictive, non-habit forming, and will help you permanently overcome the withdrawal—the first time.

“Thank you Elimidrol! I was in the worst possible place and was taking over 10 pills a day with no end in sight. I was worried every day that I was stuck here and would never know what it felt like to live again. Elimidrol changed that. It worked so well that I'm now off them and proud of where my life is today.”
 -Samantha from New York

The Elimidrol® Advantage

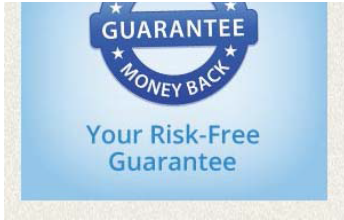

The Elimidrol advantage is in the ingredients which are scientifically blended into a formula, rather than a tablet or capsule. This allows the powerful ingredients to be delivered at a stronger dose. The high success rate is due to Elimidrol's potency and ingredient combination, selecting ingredients and dosages that are proven to provide the effectiveness you need during opiate withdrawal. Not only does the formula provide the necessary relief from opiate withdrawal, the effects can be felt from the first dose.

Money-Back Guarantee

We know what really matters is how well the product works for you, therefore we stand behind Elimidrol with a money-back guarantee.

So, don't just take our word for it. See for yourself why Elimidrol is rated #1 and get the relief you need for a successful recovery—from the first dose!

Our mission is to show that you have a bright and happy future waiting for you.

Deciding to quit was the first step. Now let Elimidrol® help you take the next step towards reclaiming your life.

ORDER NOW

"I just want to thank whoever created Elimidrol as you saved my life! The relief that it provided me was truly beyond words. I really don't know how to thank you enough." – Travis from New Jersey

-Margaret from Illinois

Thank you for helping me get my life back together. Quitting opiates was the hardest thing I ever had to do in my life. I seriously abused pain pills for over 5 years and tried quitting cold-turkey one time before but couldn't. This time I took Elimidrol and quitting was totally manageable. The effects were really good and definitely helped me keep a positive attitude throughout this low point in my life. I don't think I could have done this alone and owe so much to Elimidrol. Thank you again.

-James from California

My doctor's office closed, I couldn't get any more pills, and I was terrified of withdrawing when they ran out. I didn't know what I was going to do or where to turn. I was planning on getting on a different detox program but the side effects worried me too much. I was tired of feeling imprisoned by these pills and really wanted to quit. I found Elimidrol online and wasn't sure if it would work for me but I really needed help and bought it anyway. Elimidrol really turned me around, I'm so happy I tried it.

-Ashley from Florida

-Pastor Dan from Ohio

Getting Elimidrol was a great decision. I m a skeptical person so I was hesitant at first because I d never heard of it and didn t want to waste my money on a product that wasn t going to work. But this product works... When I thought stopping was too much to handle Elimidrol took away a lot of my pain and motivated me to continue fighting.

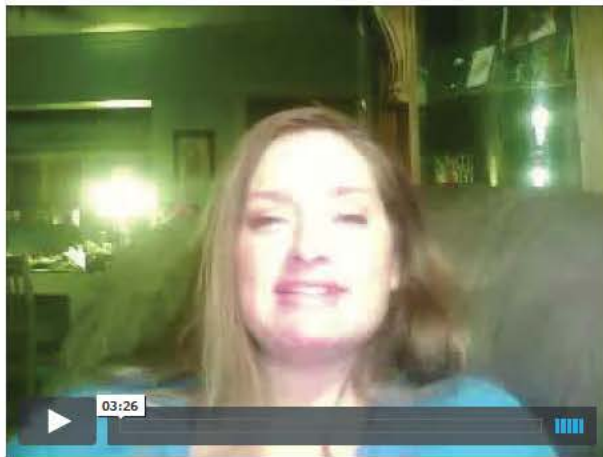

-Bi from Tennessee

You guys are saving lives. Praise Elimidrol and Sunrise Nutraceuticals for what you are doing. Watching your son go through opiate withdrawal has to be the worst thing one can experience. The feeling of not knowing how to help or even exactly what they are feeling, it s utterly horrible. I found Elimidrol in a moment of desperation and you came through with everything I was praying for. My son s whole demeanor changed. Like I could tell he finally realized he could do it. I m so proud of him for turning his life around and I m so thankful for Elimidrol, wonderful help.

-Mary from Connecticut

This product freaking rocks. I bought it, used it, and am now good and working again. It gave me glimpses of hope when I was in a very dark place and really needed it.

-Adam from Missouri

-Natasha from Missouri

The first time I heard of Elimidrol I immediately thought no way. I d been alternating between heroin (shooting it 3x a day, down to 2x a day before quitting) and methadone for 7 years, before that was weaker opiates and basically anything I could get my hands on. And to be honest, I initially thought it was claiming that I would take it and then feel good as new like withdrawal never existed. I m smart enough to know that isn t possible so I just disregarded it. A couple months later, curiosity and admittedly desperation, got the better of me, so eventually I called the company and was explained that this product doesn t get rid of the withdrawals completely but it helps reduce the symptoms of opiate withdrawal to make it more comfortable. Anyways to make a long story short, I bought it. This really is great stuff. The difference was obvious and with the effects it really helped show me light at the end of the tunnel. Granted, I did have some days that seemed extremely tough but a couple extra dosages seemed to help take care of that pretty quickly. All in all, I guess things work in mysterious ways and I m so glad I stumbled upon this Elimidrol.

-Rhonda from Ok ahoma

-Adrienne from Indiana

I was prescribed oxycodone by my doctor in 2002 after breaking both of my legs in a car accident. At first everything was fine, or so I believed, until about a year after the surgery I realized I was still taking the medications and started buying them on the street because I wanted more. I was arrested, spent a night in jail, and that is when the withdrawal began. The doctor was notified of the accident due to his name being on the pill bottle and immediately cut me off and switched me to methadone. This is when things became even worse, I thought the methadone was helping but in reality it was just a change of addiction from oxycodone to methadone. Now here I was, still addicted to pills, just different pills. I was never able to leave my house without a pill and all I could worry about was what if I lost my bottle or forget it. This is when I was introduced to Elimidrol and it saved my life. This is not an exaggeration, it SAVED my life. I started taking Elimidrol and noticed within 30 minutes of the first dose that I was actually feeling pretty comfortable and I had a new sense of clarity in me (not sure how else to describe it). I almost cried in happiness that this worked. It was the biggest relief of my entire life to know that not only was I now completely free, I was also my old self again. I have not taken Elimidrol nor any sort of drug for the past few weeks now and feel incredible. Life is colorful again, I don't feel hopeless depression and I honestly do not think I could have done it without Elimidrol. It is sad to admit but sometimes things are just too powerful no matter how much willpower you have or think you have. I love this product.

-Elizabeth from South Carolina

Thank you Elimidrol! I was in the worst possible place and was taking over 10 pills a day with no end in sight. I worried everyday that I was stuck here and would never know what it felt like to live again. Elimidrol changed that. It worked so well that I'm now off them and proud of where my life is today.

-Samantha from New York

I've had chronic lumbar syndrome since I was 23 years old. I'm now 52. I've had surgeries and nerve block injections. I've been on pain killers for the past 15 years. I feel like I've been through it all. The nurse at my doctor's office recommended Elimidrol and it really helped me. I really had a hard time coming off the pain killers until I started Elimidrol. It's been a while now and the cravings are gone and each day I'm feeling even better. Very happy I found Elimidrol.

-Thomas from Maine

-Chery from Texas

This was probably the scariest time of my life and all that I could do was worry 24/7 about when withdrawal was going to hit and how bad it would be. It was basically as bad as I imagined and then some. I had no idea until I experienced it. I wanted a way to quit but did not want any pills or anything even remotely possible of causing addiction. I was taking everything from perks to oxys to hydromorphone to heroine itself. Whatever I could get my hands on. I was taking about

10-20 pills and at least a few bags a day depending on the strengths and although Elimidrol did not give me that high or anything, it helped the majority of symptoms and allowed me time to get my mind under control and not be in a constant state of panic, anxiety, depression, muscle spasms, and crazy stomach nausea. Those were my worst symptoms and the reason, at least I believe, for all the times that I relapsed and it was a miracle to finally get something to allow me a way out. Before this product, I honestly believed I was trapped for life, I could not see a way out and I had no idea how I could beat something like this. I'm very happy to be out of this trap. This company needs to start advertising more. Everyone should be aware of it.

-John from Massachusetts

Finally something that actually works! It's been 3 weeks since I started taking this stuff and let me tell you... I'm not running marathons but I have a hell of a lot more energy than before and feeling very positive about things. I just took it as recommended and let it do the rest. I have had a bad back and knees for almost 10 years and prescription medication helped but when it came time to stopping the meds, I went through hell... time and time again. Elimidrol just works... I don't know much about what's inside but I do know that I've tried everything I could get my hands on to no avail. Thank you! I'll be sure to recommend your products.

-Sammie from California

For me, your opioid withdrawal supplement has been a godsend. I was on pain killers three times a day before taking methadone. I could not stop taking the methadone without going in to horrible withdrawals. Since being on Elimidrol I have finally been off methadone without the withdrawal problems and it has now been almost a month for me. This product has been the best thing that has happened to me. I would recommend Elimidrol to anybody who wants to be off these opioids.

-Marc from Illinois

Elimidrol is amazing. I have told my entire support group about this wonderful product. To start, let me say my hardest part of withdrawals was not the typical first few days but rather the mental part after the physical part stops. I just couldn't get motivated, I never felt like myself, always felt down, and my anxiety was non-stop. I just hated this part since it seemed to drag on and wouldn't stop no matter what I did. I bought Elimidrol while on Day 2 of withdrawal and got it the next day. I started taking it that day, day 3, and felt better within 20 minutes of the first dose. I did take an extra scoop on the first two days of using Elimidrol both of the Daytime and of the Nighttime as I had some external issues that were really stressing me out and it helped a lot with that as well. I feel very little to almost no withdrawal symptoms most of the day and can actually sleep through the night. Feel free to post this on your website, I hope my success can help others realize they aren't alone, Elimidrol will help.

-Michael from Oregon

I have referred Elimidrol to so many people now and will continue to do so. When I called you guys, I made it clear that I was very doubtful if your product could help me. Your customer service was excellent, addressed my concerns, and I figured I'd try it, even though I was still a bit doubtful. Once I took the first scoop I knew this was the real deal. That sense of calmness and comfort was exactly what I needed to get through this. Thank you for selling this product. Elimidrol is the reason I am clean today.

-Shauna from South Carolina

I am so happy for finding Elimidrol. While withdrawing Elimidrol was the only reason I could get out of bed in the morning and have enough strength to face the day. The withdrawals were so bad I couldn't do anything, it was terrible. After taking Elimidrol I had the boost I needed and was able to get out of bed, shower, run errands, and be part of my family again. Feeling normal is beyond great.

-Jesse from California

Elimidrol I would love to thank you for giving me my life back! I have struggled with opiate addiction for years. First it was heroin for 2 years and then I was on oxycodone for 1 year taking up to 660-700 MG a day! Now I'm on day 4 and my head is clear I feel better than I ever have, just lacking some energy! Thanks to you Elimidrol because I almost lost my husband and home due to my stupidity! To those of you who wonder if this works... IT DOES!

-Amanda from Kentucky

I was lost and had no idea where to turn. Just thinking about withdrawal scared me so bad. I really doubted this could work and once I received it I was hesitant to even take it. Well it finally became time to try it out and I felt the relief very quickly. For anyone in doubt, just give it a try and you'll see.

-Mady from California

Elimidrol made what my wife and I thought was going to be impossible, very doable. I started taking low doses of Vicodin for medical purposes, which then led to high doses of oxycodone, which then eventually led to Dilaudid. My wife then started taking oxycodone and before we realized it, everything became out of control. I lost my job, we lost our house, we were broke, and we still couldn't get ourselves to stop. My wife and I took Elimidrol for the first time together and we were ecstatic. I mean truly delighted that it actually worked. We felt this sense of normalcy and like we can do this. That was over a month ago and neither of us has touched a single drug since. Thank you Elimidrol.

-Bruce and Cheryl from Tennessee

Thank you, thank you, thank you for helping me live again... Before starting on Elimidrol my withdrawals were so awful that I hated laying down at night because I couldn't ever sleep well and I dreaded the thought of waking up to another day of pain. Elimidrol changed all this and now I have my life back... and it's a life worth living. Thank you!

-Lynne from Okahoma

Your product is a miracle. Please feel free to use this letter for your testimonial or whatever other purposes as I hope others can get the help I received from Elimidrol. I felt hopeless and like I would never return to normal after using opiates on and off for over 12 years. The depression, anxiety, vomiting, restlessness, it was all just becoming way too much to handle. I first used methadone to try and quit but the methadone withdrawal was horrible. It was so bad that I went back on oxycodone just to make it stop. Then my doctor gave me Suboxone and that was a little better but still extremely excruciating when trying to quit. I felt like the withdrawal never stopped. That led to 4 more straight years of heroin and oxycontin abuse. My best friend had some Elimidrol and after I tried it, I couldn't believe how much better I felt. I then ordered the Nighttime and Daytime and the relief it provided me was amazing. I finally could sleep through the night and I was able to go to work during the day. I felt happy finally. I am now proud to say I am 73 days clean and feeling better than I ever have. I give this product a 10 out of 10.

-Jason from New York

You completely amazed me. I had no clue what to expect but was surprised when it really worked. Was just so scared and hyping myself up that it wouldn't. You had really great customer service as well, thank you for this.

-Jaden from Ohio

I tried quitting at least 3-4 times cold-turkey in the past before I finally realized I just couldn't handle it. I needed help desperately. Time felt like it never moved, I was depressed, I was anxious to the point that my skin was tingling and I just couldn't stop moving. This wasn't just restless legs, it felt like my whole body was restless. I was sweating and freezing at the same time and just so nauseous. My stomach was cramping and my brain was in a fog where I just couldn't think straight. It was bad. I bought Elimidrol one night when I was not able to sleep. I really didn't even read much about it but I needed something and was at my wits end. After taking the Elimidrol I first noticed the brain fog was gone. Then my body wasn't really aching or feeling off temperature wise any more. My body and mind actually felt comfortable, which I never experienced before in withdrawal. I can't even believe I'm already on day 6 of withdrawal right now. I'm free of opiates and I give most of the credit to Elimidrol! This is an excellent product and I won't hesitate to recommend it to anyone.

-Brent from Illinois

I appreciate what Elimidrol did for me. I have a profession where it was very important for me to do this at home in complete privacy. Elimidrol allowed me to do so and really helped me a lot. I felt it from the first day and the daytime helped me still get stuff done and the nighttime helped me actually get some rest. The fact that this really worked in itself was a huge relief. A real life saver, thank you.

-Stephen from New Mexico

As promised, I noticed the Elimidrol taking effect after the first dose and it made everything so much more bearable. I used both the Daytime and Nighttime and both did what they stated. I am most likely going to be placing more orders as I really like the way this product makes me feel. I feel happy, calm, and energetic. I love it. Great product.

A Supplement For Opiate Withdrawal?

Opiate addiction treatment generally follows the standard of pharmacological and behavioral approaches. But who on the market has been considering dietary needs during withdrawal from opiates in recent months?

Today, we speak with Adam Layne of Sunrise Nutraceuticals, the producer of Elimidrol about vitamins during detox. Basically, Elimidrol is a supplement formula crafted for either daily and/or nightly usage that should provide relief for those struggling with withdrawal symptoms of opiate addiction. Elimidrol

TREATMENT Q&A
 COSTS
 FINANCING
 INSURANCE
 INTERVENTIONS
SPECIAL POPULATIONS

IS NOT an approved medication used during opioid withdrawal, but its manufacturers have created it to help with a wide spectrum of detox from opiates such as:

- codeine
- heroin
- methadone
- OxyContin (oxycodone)
- Percocet (oxycodone)
- Suboxone (buprenorphine)
- Vicodin (hydrocodone)
- Suboxone (buprenorphine)

The formula contains proprietary blend (listed on the package) of pharmaceutical grade ingredients, herbs, amino acids, minerals, and supporting nutrients. While think that vitamins for drug withdrawal may look too good to be true, Elimidrol offers a 100% money back guarantee if you are not happy with the product.

More here about the product's safety, efficacy, and use. Then, we offer you our conclusion on this product and invite you to leave your questions, comments, or reviews of Elimidrol in the comments section at the end.

ADDICTION BLOG: *Thanks for joining us, Adam. Is Elimidrol only to be used during opiate withdrawal? Can it support withdrawal from benzodiazepines, stimulants drugs, or alcohol?*

SUNRISE NUTRACEUTICALS: Although there are many similarities among the withdrawals that occur with different substances (benzodiazepines, stimulants, alcohol, methamphetamines, and so forth), these withdrawals can also come with different intensity levels, as well as different characteristics. That is, certain symptoms that are prevalent during opiate withdrawal may not be present during withdrawal from other classes of drugs, and vice-versa.

While we have received feedback from many people who have used Elimidrol to help successfully overcome their dependence on other substances, Elimidrol itself was specifically formulated for opiate withdrawal, and therefore may not be as comprehensive in addressing each and every symptom of drug withdrawal.

ADDICTION BLOG: *This formula has been placed on the market and claims to be unmatched by its competition. Specifically, how is Elimidrol different than other formulas, as well as the Thomas Recipe, a DIY home detox combination? How is a powder form of supplement a better choice while withdrawing from opiates/opioids?*

SUNRISE NUTRACEUTICALS: Elimidrol is different in several ways from any other opiate withdrawal supplement on the market, and is completely non-addictive and non-habit-forming. The differences start with Elimidrol's very high success rate, which we've made possible through a carefully selected combination of potent ingredients in optimal dosage amounts that can deliver the effectiveness that's crucial to successful opiate withdrawal. While there are a few similar ingredients between Elimidrol and other products, the Elimidrol difference comes from a total package – formulation, potency, dosage – that is significantly different from anything else available. Elimidrol was scientifically designed to be the best product of its kind for combating opiate withdrawal as effectively as possible with no risk of addiction.

While the Thomas Recipe is somewhat on the right track, it's not quite the solution we need. Elimidrol is a superior alternative to the Thomas Recipe in relieving the symptoms of opiate withdrawal. The problem many people are finding with the Thomas Recipe is that this recipe is really just a basic grocery list – a handful of supplements and medications you're told to buy separately, and then take according to a regimen. However, the method is limiting and incomplete, because the recipe simply doesn't contain enough to provide adequate support throughout the complex and demanding process of opiate withdrawal.

Supplements for opiate withdrawal: INTERVIEW with Elimidrol manufacturer, Sunrise Nutraceuticals | Addiction Blog

Elimidrol is a highly comprehensive formula that will significantly reduce the symptoms of opiate withdrawal, making the process more comfortable. Elimidrol will not remove the symptoms 100%, to the point that you would forget you're in opiate withdrawal, but it can make those symptoms (and their intensity levels) far more manageable both mentally and physically.

Elimidrol comes in a powder form because we found that pills and capsules are much too limiting for a product like this to be as effective as possible. By making Elimidrol into a powder, we were able to formulate the product to the exact specifications and optimal dosage amounts required for maximum withdrawal relief – something that's just not possible with a capsule or pill.

ADDICTION BLOG: *Is doctor's supervision and prescription needed or suggested when taking Elimidrol?*

SUNRISE NUTRACEUTICALS: When consuming any supplement or formula it is always advisable to consult with your physician, especially if you're using any prescription or over-the-counter medications or dietary supplements, or if you have any pre-existing medical conditions.

ADDICTION BLOG: *Are any adverse side effects possible when using Elimidrol?*

SUNRISE NUTRACEUTICALS: There are no reported adverse side effects when using Elimidrol. The ingredients and dosages have been carefully selected to ensure the highest safety levels. However, this does not mean that adverse reactions are impossible; side effects can occur any time that any substance is ingested. To minimize this remote chance, always follow the directions on the bottle.

ADDICTION BLOG: *Can Elimidrol be used if the user has concurrent medical conditions which require pharmaceutical/Rx medications?*

SUNRISE NUTRACEUTICALS: Although we do not have any reports of pharmaceutical medications interacting negatively with Elimidrol, we do advise all users to first consult with their physician prior to consuming Elimidrol or any other supplement. This is especially true when using pharmaceutical medications known for their high interaction potentials, such as SSRI and MAOI anti-depressants.

ADDICTION BLOG: *Can pregnant women, or women that gave birth recently use the product? Can Elimidrol do harm to a fetus?*

SUNRISE NUTRACEUTICALS: Do not take Elimidrol, or any other supplement, while pregnant or nursing unless specifically recommended by your physician.

ADDICTION BLOG: *Where can we find information about Elimidrol's clinical trials? Have details/results been made public?*

SUNRISE NUTRACEUTICALS: Supplement formulas cannot get the same "copy protection" and patents that drug and prescription medication manufacturers are allowed. Therefore, by releasing clinical trial data, we would be making public some very key, proprietary information on how we were able to make Elimidrol the highly effective opiate withdrawal supplement that it is. Instead, we are given the option to keep this information proprietary, ensuring that competitors do not simply take the information that took us many years of hard work to discover, analyze, and formulate into such a valuable product for our customers. At the end of the day, it's our customers who tell the Elimidrol story best. You can find their experiences on our testimonials page at [Elimidrol\[dot\]com](http://Elimidrol[dot]com).

ADDICTION BLOG: *For how long do you suggest Elimidrol clients use the product during withdrawal?*

SUNRISE NUTRACEUTICALS: We recommend taking Elimidrol until you are at least past the acute stage of opiate withdrawal. The length of withdrawal will differ by individual, depending on many variables such as opiate type, duration of use, metabolism, and so forth; however, as a very general guideline, most people find that after 1½ to 2 weeks they're feeling significantly better, even after discontinuing use of Elimidrol. We do recommend finishing the bottle to ensure a smooth recovery.

ADDICTION BLOG: *Your company is offering a 100% money back guarantee – has anybody asked for a refund on the product yet?*

SUNRISE NUTRACEUTICALS: Although it's a very rare occurrence, there will always be certain exceptional situations that make it necessary for a person to return the product. We're proud to say that well over 99% of the customers who purchase Elimidrol are happy with the results and decide to

Supplements for opiate withdrawal: INTERVIEW with Elimidrol manufacturer, Sunrise Nutraceuticals | Addiction Blog

keep it. However, we want to allow all of our customers to make their purchase with the same confidence that we have in the product, which is the reason for our 100% money back guarantee. This is a product that will start working with the first dose, and you will feel the difference on the first day.

ADDICTION BLOG: *Do you have anything else you'd like to add?*

SUNRISE NUTRACEUTICALS: We know that addiction has had a very serious impact on countless lives across the world, and that no matter what type of addiction someone is facing, there is no easy fix. Not even Elimidrol can magically solve anyone's problems, but we do know that in its short existence, Elimidrol has already helped ease the agonizing opiate withdrawal symptoms of thousands who have made the decision to reclaim their lives. We want people to know that it is possible, that the support is out there, and that we're here to provide it.

Addiction Blog Conclusion

How truly effective is Elimidrol? This usually depends on a person's metabolism and natural reaction to supplements; some people may have good results in a short amount of time, and some might take little longer. The product is overseen by the FDA and must adhere to enforced guidelines as specified in the DSHEA (Dietary Supplement Health and Education Act) and the FD&C (Federal Food, Drug, and Cosmetic Act). But we'd like to hear back from current or past users in the comments section.

Generally, this product has received positive reviews in online forums. A money back policy seems to stand behind the product. However, we are still skeptical about how this supplement mix might do a better job than naturally taking the given vitamins listed in ingredients. Similar mixes of vitamins, minerals, and herbs are available on the market but have been met with very mixed reviews. Of the few current critiques of Elimidrol, we have found that you can prepare a similar vitamin – mineral mix at home (such as the Thomas recipe). But in truth, to collect all these ingredients via food and fluids during the day, would cost more than a package of Elimidrol: at 224 grams per piece, has a competitive price of \$75 each.

In conclusion the question still stands: Is Elimidrol worth a try as a supplement during opiate withdrawal? In our opinion, check in with your supervising doctor first; and as long as it is safe...why not?

We invite your feedback now.

Excellent! It's amazing how many ignore this aspect of addiction, yet claim to be healthcare providers.

As a past user of Elimidrol I can say the product works wonderfully. I am now 6 months clean and have a new found respect for my life. I'll never go back. I also recommend joining NA (or even AA) or some sort of support network as it helps to have people to talk to. Half a year, can't believe it, thank you elimidrol!

Your article is very helpful thank you very much for sharing .

planing on to order Elimidrol tomorrow morning

4:10 am October 31st, 2014

I've been reading quite some time about ELIMIDROL I might have read only one critique,, all are good experiences successful in widrawl relief...I will keep you guys posted as soon as I receive the product and take it I will make my first video...I've been addicted to TRAMADOL for over 8 yrs...not by choice,,it was an accident becoming Dependant to this drug, plus I had never been addicted to anything at the time I realize I was addicted my body was going thru widrwals...and I was terrified,,my body is the type tga will go tru widrawls 3 hrs of last pill,i dont take more than 8-10 pills a day, starting with 2 in the morning,with lil kids at home I couldn't even try to cleanse my self..but am done, I pray God to help me give me streng h and with my own streng h God and Elimidrol, I know I can do his... wish me luck anyone...

Scott

9:54 am November 23rd, 2014

@Plannin on to order elimidrol...

Well, you have not posted back...are you still taking tramadol? Also 8-10 a day! You are beyond the seizure threshold limit. No doctor would prescribe that amount. It is your own problem you created... no accident. Take accountability, it was you that did this to you! Anyways with that said I do hope you stop taking the drug. Please let us know how it is going and don't just post that your buying his product and then not post your review!

Supplements for opiate withdrawal: INTERVIEW with Elimidrol manufacturer, Sunrise Nutraceuticals | Addiction Blog

i just ordered i hope it works out like all the hype points to. Im a hippe man and need it to str8tin up im using this stuff to help my surfing/masterbation addiction thank you !!!

Susan

5:36 am December 14th, 2014

Totally agree with SCOTT!...Let us know please how you get on...I am in a desperate situation n would like to go n find out more about this product. Take care, God Bless ...

Thomas

8:36 pm December 18th, 2014

This works miracles. For 13 years I took pain medications prescribed by doctor for an accident back in 2000. So basically all of my 20s and almost half of my 30s were lost to those god awful drugs. Good lord, it felt like the methadone was breaking my bones. Yes they were prescribed and yes they were amazing at first but oh my god... hey consumed every part of me. Elimidrol cut the hideous withdrawals down and made the "I can't do it" voice disappear. Remarkable, bless you and everyone involved with it.

jesse B

2:31 am April 12th, 2015

I used roxi 30s for about a year hen went to heroin ive been addicted for 18 mths and im so tired of living his way !! I really want to stop but the withdrawal scares me throwing up,diarrhea, stomach pains, not sleeping thats just the physical the symptoms the depression the not having any energy or being able to function if this product can help me deal wi h the physical and mental withdrawal I have to try it hey offer financial assistance which will help im going to get it as soon as I can get the money I promise I will let everyone know my results I want to be free from this please pray for me!!

Are you challenged by opiate addiction? It is a very complex and difficult problem. Being addicted to opiates not only affects your health and happiness, it can be fatal. Not only that, but everyone around you. It's likely that you want to stop this behavior; get clean, sober and healthy. But withdrawal causes intense discomfort and can't be done simply by willpower. Due to this discomfort, many people find it overwhelming to even take the first step on the path to sobriety. But now there's help with [Elimidrol](#).

With Elimidrol, you finally have the support you need to take that first step towards wellness. Elimidrol provides the support you need to begin your journey, regain your life, and take back your future.

It is time to live your life free from the restraints of opiate addiction. You don't have to keep suffering! You can stop the suffering and get your life back.

[Elimidrol](#) is a scientifically formulated detox support supplement that will provide you with not only the comfort, but the strength that is so vitally necessary to overcome the insidious addiction to opiates. It alleviates the intense physical and mental discomfort that addicts go through just to start their journey to health. Elimidrol[®] was designed for effectiveness and simplicity to make this process as easy as possible for you while alleviating the negative symptoms and promoting a positive mood throughout the entire process. Experience the Elimidrol[®] difference today and feel the effects after just one dose!

Elimidrol offers powerful relief for all opiate withdrawals including prescription opiates, heroin, methadone, and suboxone.

Elimidrol has both a daytime and a nighttime formula, both of which offer different types of physical support that will help to ease you through the difficulty of withdrawal.

Many opiate withdrawal treatments on the market today come with the risk of further addiction. Elimidrol is non-addictive, non-habit forming, and will help you permanently overcome the addiction—the first time.

Elimidrol from Sunrise Nutraceuticals Quickly, Safely Alleviates the Agony of Opiate Withdrawal

New non-addictive opiate withdrawal supplement backed by scientific research and personal experiences starts working with the first dose.

Boca Raton, Fla (PRWEB) December 10, 2013

Tweet Like +1 Share Pin it EMAIL

With opiate addiction now a national epidemic, more people than ever are looking for a less painful way to detox, break the addiction cycle and move on with far happier lives. Today, Sunrise Nutraceuticals is pleased to announce the nationwide release of Elimidrol, a revolutionary new opiate withdrawal support supplement that brings safe, around-the-clock relief to those struggling with dependence on the full spectrum of opiates, including OxyContin (oxycodone), Percocet (oxycodone), Vicodin (hydrocodone), Suboxone, codeine, methadone, and heroin.

As anyone who has been through the experience knows, the path to addiction recovery can be an unbelievably rocky one. By smoothing that path and turning down the pain, Elimidrol turns up the chances of a successful recovery, boosting the mental and physical strength it takes to make it through the opiate withdrawal phase and leave addiction behind permanently.

Developed in partnership with Care Plus Medical Group, Elimidrol is the product of extensive laboratory research on — and personal experience with — the negative physical and mental effects that come with opiate withdrawal. The key to why Elimidrol works is in Sunrise Nutraceuticals' reliance on scientific data and clinical findings from highly respected establishments such as the Addiction Research Center of the National Institute on Drug Abuse. In this way, Elimidrol is a culmination of decades' worth of cutting-edge research and treatment methods that work. The result: a safe, non-habit-forming opiate withdrawal support supplement that targets all of the opiate withdrawal symptoms with a carefully balanced formulation of pharmaceutical-grade ingredients, minerals, amino acids and herbal ingredients — all blended and tested in a U.S. Food and Drug Administration (FDA) and Good Manufacturing Practice (GMP) certified facility.

Sunrise Nutraceuticals knows that scientific research is crucial to making a state-of-the-art supplement like Elimidrol work. Just as importantly, this is a company that knows opiate withdrawal is not just about labs and lists of clinical symptoms with names like dysphoria and akathisia. Withdrawal means overwhelming feelings of darkness, anxiety, and a deep, constant, physical ache that things are "not right". These are the "agonies" that can completely disrupt lives, making everyday situations at home, at work, and in public seem utterly unmanageable. As the people at Sunrise Nutraceuticals understand through friends, family, and first-hand experiences, the opiate withdrawal journey is intense and potentially terrifying. Elimidrol is designed to take out the fear factor, opening the door for that first step toward a richer, more productive life. Opiate withdrawal detox is a life-changing journey that can be made, and Elimidrol is the support supplement that helps guide the way.

For around-the-clock alleviation of opiate withdrawal symptoms, Elimidrol is now being made available in two forms, Elimidrol Daytime and Elimidrol Nighttime. Both varieties have been formulated by lab specialists to provide ideal dosages of each pharmaceutical-grade ingredient — components that have been shown to reduce restlessness and anxiety while promoting positive mood, vitality, comfort, calmness and restful sleep. While other opiate withdrawal support supplements may contain some similar ingredients: using a pill, capsule, or liquid form means limited dosages and reduced effectiveness. Elimidrol is the only mixable powder, allowing it to deliver the ideal dosages with a one-of-a-kind synergistic effect that safely diminishes withdrawal discomfort while providing the body with the nourishment it needs throughout the detox process.

The effect is fast: depending on a person's body type and metabolic rate, the Elimidrol difference can be felt as little as 30 minutes after taking the very first dose. In addition, Elimidrol is not at all habit forming — something those who have tried to "quit" by replacing one opiate with another will find very reassuring.

The high success rate that Elimidrol provides in overcoming opiate withdrawal allows the company to confidently offer a 100% Money-Back Guarantee. Details of the policy are available through the Elimidrol website, as is a clear and informative Frequently Asked Questions page full of answers to common concerns regarding Elimidrol and its proper use as an opiate withdrawal support supplement.

The following information is also available at <http://www.elimidrol.com>:

- ▶ Sunrise Nutraceuticals Partner Program for doctors, offering Elimidrol as a complement to other treatment regimens, and including support for marketing and inventory management in order to bring the highest level of care to patients.
- ▶ Online ordering for Elimidrol Daytime and Elimidrol Nighttime.

"It's safe, reliable, and it works. Elimidrol is the difference between just another failed attempt and lifelong success."
