FEATURED PRODUCT: Cha' de bugre Extract
Nutraceuticals International is pleased to bring you this new energy product from Brazil, which represents the perfect replacement for Ephedra as a stimulant and weight loss product. Our exclusive 10:1 and 20:1 extracts are a naturally powerful source of energy without the negative side effects commonly associated with energy stimulant products.

For use in products for energy, weight loss, appetite suppression, cellulite reduction, and circulatory stimulation: Cha' de bugre Extracts are being found to have benefits in a number of applications. Historically this was brewed into a tea or coffee-like beverage and served at times of festival in Brazil, so help festival goers could continue to celebrate through the evening into the morning hours, without nervousness, stomach upset, or potential health risks.

FEATURED PRODUCT: Green Lipped Extract
Green Lipped Mussel is a natural health product grown in New Zealand on government approved coastal marine farms. They are grown in pure, clean waters which are frequently monitored to ensure the highest quality product. Regular consumption of green lipped mussels or their extract may help to reduce joint pain, improve flexibility and rebuild lost cartilage, as well as helping to maintain good health and well being.

Green Lipped Mussel Extract is sourced from the New Zealand Green Lipped Mussel which is found in the clean waters of New Zealand and provides an extract of the highest quality. Mussel Lipids are known to contain the essential fatty acids. Essential Fatty Acids are the "good fats". EFAs support the cardiovascular, reproductive, immune, and nervous systems. The human body needs EFAs to manufacture and repair cell membranes, enabling the cells to obtain optimum nutrition and expel harmful waste products.

FEATURED PRODUCT: Hoodia Gordonii
Hoodia Gordonii is a plant known to the indigenous tribal people of South Africa. It is used by the San Bushmen for the suppression of appetite at times of little food, they also say it provides an uplifting in mood, increases sexual stamina, and leaves on with a feeling of nourished energy, as if you have eaten a full meal and you can continue about you day.

Hoodia Gordonii is being cultivated in mass quantities in South Africa for export all over the world. And although many attempts have been made to cultivate Hoodia plants in other parts of the world, plants grown outside of South Africa has little to no active steroidal glycosides which is what leads to Hoodia's ability increase ATP levels. The sympathomimetic of the brain leading to an effect of energy sensing ability and the suppression of the feeling of hunger. When the body is instead it does not want for food.

Ingredients by Common Uses

FEATURED PRODUCT: Vitamin K2 (MK7)

Vitamin K is absolutely essential to build strong bones - and helps promote heart health. For several years, compelling evidence has shown that most people don't get enough vitamin K to protect their health through the foods they eat. Vitamin K2 is a newly available extract of natto that provides the highly bio-available form of vitamin K2 as menaquinone MK-7.

Vitamin K plays a crucial role in many bodily functions.* It may be a key vitamin to fight the signs of aging** - it's a stronger antioxidant than Vitamin E or coenzyme Q10.*** And now, scientists are even looking at vitamin K to be the future of promoting immune health and supporting memory. Considering the importance of this vitamin, it's reasonable to question if you're getting enough. Vitamin K exists in three forms, K1, K2, and K3. All are fat-soluble. This is important because dietary fat is necessary for the absorption of the vitamin, meaning that in order for your body to absorb it effectively, you need to eat some fat along with it.
