# She LOST 23 lbs. and GAINED a 23 HOT NEW BOYFRIEND!

Changing her life 180° was a breeze with a simple nighttime ritual.

Meet Tunde Abri, an early childhood educator and a single mother. You would guess with the amount of time she spends around children that keeping active and staying in shape wouldn't be a problem for her, right? Wrong! Between motherhood and a full time career, Tunde spent more time caring for others than looking after herself. She gained 50 pounds during her pregnancy and after the birth of her daughter she just couldn't lose the final stubborn pounds. Determined to get back in shape she added stimulant-free nighttime Accelis™ to her weight-loss program.

"I've been told I look sexy and tiny. I love the millions of compliments that I have received—not to mention a new boyfriend."

#### ACCELIS IS SO EASY TO USE

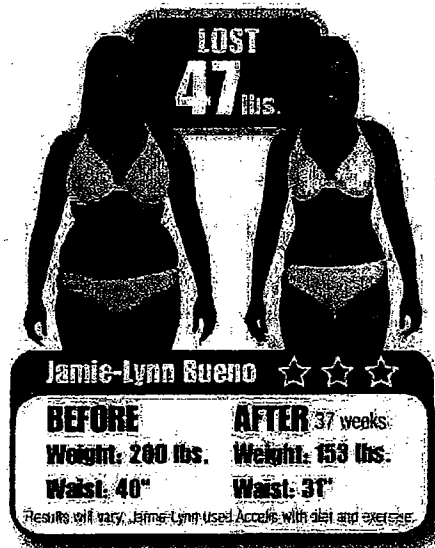

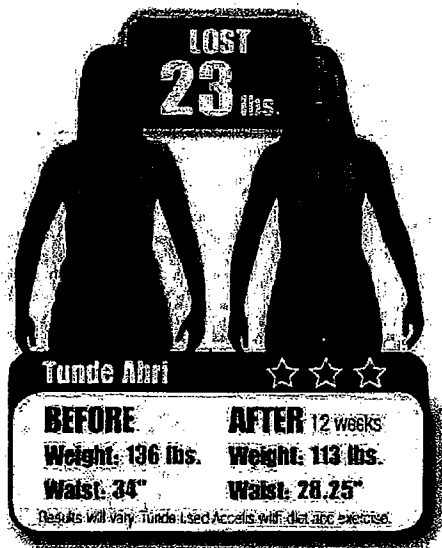

With just one easy serving before bed each night, in addition to her diet and exercise plan, Tunde got the results she wanted. "Accelis was really easy to take, you just have to take it at night before you go to sleep," says Tunde. "I never forgot to take it. It was so easy."

#### ACCELIS WORKS FAST

Accelis uses the world's first patented softgel technology with 3% carnosine acid for accelerated weight loss that's sure to get noticed! Tunde lost an incredible 24 pounds in just 12 weeks and suddenly found herself with a hot new boyfriend.

**CLINICALLY PROVEN KEY INGREDIENT**

Doctor-formulated Accelis is a revolutionary scientific breakthrough that fits easily into your hectic routine. So how does Accelis work? Expert researchers believe the clinically proven key ingredient in Accelis produces rapid weight loss by increasing the rate at which your body uses up your blood sugar for energy. The result of this enhanced use of blood sugar allows stored fat to be broken down and used as an energy source, resulting in effective and accelerated weight loss that's sure to get noticed. Just look at Tunde and her friend Jamie-Lynn's before and after pictures for proof. Both followed a diet and exercise plan in addition to taking

Accelis before bed. This is where Accelis stands apart. Forget about multiple servings that are timed around meals. Now you can just incorporate one easy serving before bed into your healthy and active lifestyle to trigger noticeable weight-loss results just like Tunde and Jamie-Lynn. And best of all, it won't make you feel wired or jittery because it's stimulant-free. Accelis helped Tunde achieve life-changing results easier than most would think. Now it is your turn to discover what the power of Accelis can do for you.

"I recommend Accelis because its key ingredient, 3% orosolonic acid, has been clinically proven to be effective for weight loss."

### Dr. Andrew Parkinson, MD, Resident Physician endorses Accelis™

STUDY	
Evaluated the Effects of Corosolic Acid on Weight Loss.	
STUDY	A study group of overweight volunteers who met the required criteria were randomly selected. Volunteers were divided into one of two groups: Group A received corosolic acid and Group B received a placebo (an inert sugar pill). Both groups were instructed to take 2 capsules before bedtime. Both groups maintained the same low-cal diet throughout the study. Although both groups lost weight at the end of the 8-week study, the weight loss for Group A (the ones that received corosolic acid) was significantly greater than the placebo group.
RESULTS	In an 8-week study, subjects using the key ingredient in Accelis™ lost an average of 10.65 pounds while compared to subjects using the placebo who lost an average of 5.87 pounds. Both groups followed a calorie-controlled diet. Additionally, the researchers noted that half of the subjects using the key ingredient in Accelis lost greater than 10 pounds! Two exceptional participants had a weight loss greater than 20 pounds!
CONCLUSION	<b>With Accelis, the study group had almost double the weight loss of the placebo group! The key ingredient in Accelis was found to be effective as a weight-loss product.</b>
MECHANISM	Researchers conducting the weight-loss study proposed that corosolic acid was able to stimulate specific transport receptors to bring glucose into the skeletal muscle cells. This transfer helped to lower blood sugar levels, which in turn caused the breakdown of fat cells.

## nanoSLIM – World's Smallest Weight-Loss Solution™

- Nano-Engineered for Rapid Absorption & Maximum Effectiveness
- Proven to Cause Faster, More Dramatic Weight-Loss
- Just 1 Ultra-Easy Serving Per Day

Introducing new nanoSLIM™ – the World's Smallest Weight-Loss Solution. Before nanoSLIM was developed, we realized there was an unmet need for people like you who wanted to lose weight fast and conveniently. Meeting this need requires creating a powerful, fast-acting, and extremely effective product all in a tiny, easy-to-use, once-a-day serving size that would conveniently fit into your daily diet and exercise routine.

### Our Scientists Created a Pill so Powerful and so Small – It's Amazing!

Having a clear focus on what was needed, we put our scientists to work to develop something new, something groundbreaking, something so unique it would challenge the conventional thinking of the typical "diet pill." The end result will blow you away. Using a special manufacturing process called Nano-Disperse™ Technology (hence the "nano" in nanoSLIM) our scientists created a pill so powerful and so small that we had to create a new name for it that effectively distanced it from the standard "diet pill."

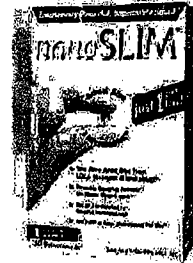

The micro-bial is a weight-loss solution formulated to be tiny compared to a diet pill. It is a fraction of the size of a standard breath mint. But keep in mind, this reduction in size does not compromise the effectiveness of nanoSLIM at all. It's the perfect combination of ultra-convenience, effectiveness, and cutting-edge technology.

Try nanoSLIM and we know that you will never go back to the inconvenience of conventional diet pills again. With nanoSLIM, you won't have to choke down multiple daily servings of oversized pills, or live with the inconvenience of carrying them around with you all day having to take extra care not to crush them.

Clinically Proven Immune System Support

### Nano Technology - The Process of Nanoparticulation\*\*

A precise portion of the clinically proven key compound in Allergy MD™ is nanoparticulated, using a pneumatic and jet milling system, reducing it to micron size for faster absorption.

**Step 1:** The non-particulated compounds are placed into a gravity fed hopper that feeds them into the jet mill.

**Step 2:** Once in the jet mill, the compounds are subjected to a high vortex (powerful washflow) forcing causing the compounds to smash into one another until they're reduced to micron size.

**Step 3:** Once the compounds are micron size, they are drawn to the center of the mill where they leave the mill via a pneumatic conveyor. Then the compounds are verified using sophisticated laser light scattering analysis for quality control. After which, the high-quality micron-size compounds are collected and added to complete the formula.

**The Result:** A precise portion of the clinically proven compound in Allergy MD™ is reduced in size, making it smaller than traditional compounds found in most other products. Therefore, your body can start to absorb and use the clinically proven compounds in Allergy MD fast providing superior immune system support.

Allergy MD contains a dual-release caplet formulated with a unique dual-release effect that works fast to deliver relief and then provides relief that lasts throughout the day. \* In cooperation with FDA.

• **The All-in-One Solution:** Medical doctor formulated\* and approved Allergy MD™ is an all-in-one formula with a clinically proven compound scientifically designed to support your immune system in a totally new and powerful way! Many of the other products on the market do not provide both fast and long-lasting effects—and many provide no immune support at all! This is where Allergy MD is completely different. By providing fast, as well as extended immune system support, Allergy MD is non-drowsy and has powerful effects that last throughout the day.\*

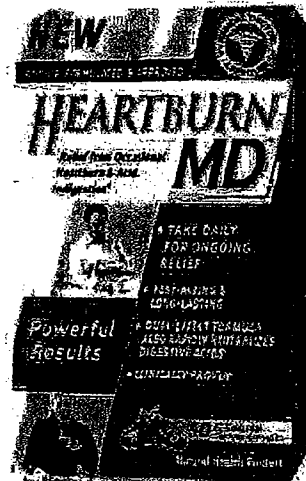

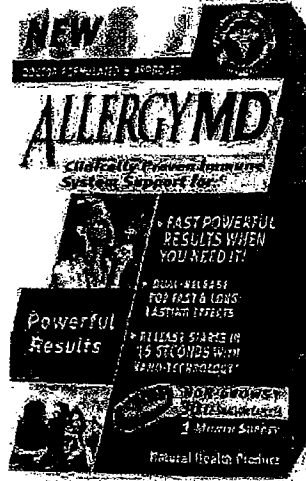

• **The Importance of the Immune System:** Allergy MD is so effective because its key compound promotes the suppression of a specific immune-active group of molecules known as leukotrienes\*. Allergy MD provides an unprecedented level of immune system support and helps the body suppress the effects of the leukotrienes so you can be at your best.\*

• **Clinically Proven and Doctor Formulated:** Peer reviewed and published clinical research testifies to the power of the key compound in Allergy MD. In one key double-blind, placebo-controlled study, participants demonstrated significant improvements in combating the physiological effects of numerous episode types.\*

New doctor-formulated† and approved Allergy MD™ is a unique all-in-one formula with clinically proven compounds that have been scientifically developed to help support your immune system against seasonal and environmental challenges. Most dietary supplements do not provide both fast and long-lasting immune support, but this is where the dual-release Allergy MD formula differs from single-purpose formulas. Even better, unlike any other dietary supplement, Allergy MD uses cutting-edge

Nano-technology, so that the clinically proven compound starts to release in just 15 seconds! Then, the extended-release technology ensures you get powerful, 100% drug-free, and long-lasting results. By providing fast as well as extended support, Allergy MD helps you overcome seasonal and environmental challenges quickly. **The Importance of the Immune System:**

Allergy MD is so effective because its key compound inhibits a specific immune-active group of molecules known as leukotrienes. These leukotrienes mediate the immune system reaction in your body. ## HOUSE CALL WITH MARVIN HEUER, MD, FAAFP

House call with Dr. Marvin Heuer

### Question: What makes Allergy MD™ unique from a doctor's perspective?

Answer: Many products do not provide both fast and long-lasting immune support for people who suffer from seasonal and environmental challenges. Allergy MD is different and unique because of its dual-release formula. Many products are only single purpose formulas. Allergy MD also uses cutting-edge Nano technology, so the clinically proven compound starts to release in just 15 seconds! Additionally, Allergy MD has extended-release technology which ensures you get powerful, 100% drug-free, long-lasting results. Because it provides fast, as well as extended support, Allergy MD helps you quickly rise above seasonal and other challenges. With just one easy serving, Allergy MD provides you with powerful support that lasts.

[Back to top](#)

### Question: Why would you recommend Allergy MD?

Answer: First of all, Allergy MD is 100% drug-free and helps support the immune system against seasonal and environmental challenges. Plus, Allergy MD contains a clinically proven compound. This ensures that the key ingredient has been studied. Therefore, once you look at the quality of Allergy MD and see that it provides both fast and long-lasting results, it's hard to recommend anything else.

[Back to top](#)

### Question: How does Allergy MD work with someone's immune system?

Answer: Allergy MD works with your body's immune system to help you fight back against seasonal and environmental challenges. How does this work? Allergy MD is so effective because its key compound promotes the suppression of a specific immuno-active group of molecules known as leukotrienes. These leukotrienes mediate the immune system response in your body. When leukotrienes are elevated,

your body manifests a variety of undesired reactions as a result of environmental challenges. By inhibiting the immune system from activating the effects of these leukotrienes, Allergy MD provides immune system support so you can rise above seasonal and environmental challenges.

[Back to top](#)

**Ques: Can Allergy MD be used daily?**

**Ans: Absolutely!** In fact, it is recommended that Allergy MD be used daily for maximum immune system support. Again, Allergy MD is powerful, 100% drug-free, and it provides long-lasting results. With benefits like these, why wouldn't you want to take Allergy MD every day?
