HOW DO YOU KNOW IF YOU MARRIED THE RIGHT PERSON?

During one of my seminars, a woman asked me a question. She said, "How do I know if I married the right person?"

I noticed that there was a large man sitting next to her so I said, "It depends. Is that your husband?"

In all seriousness, how do you know?

Here's the answer.

EVERY relationship has a cycle. In the beginning, you fell in love with your spouse. You anticipated their call, wanted their touch, and liked their idiosyncrasies.

Falling in love with your spouse wasn't hard. In fact, it was a completely spontaneous experience. You didn't have to DO anything. That's why it's called "falling" in love - because it's happening TO YOU.

People in love sometimes say, "I was swept off my feet." Think about the imagery of that expression. It implies that you were just standing there; doing nothing, and then something came along and happened TO YOU.

Falling in love is easy. It's a passive and spontaneous experience.

But after a few years of marriage, the euphoria of love fades. It's the natural cycle of EVERY relationship. Slowly but surely, phone calls become a bother (if they come at all), touch is not always welcome (when it happens), and your spouse's idiosyncrasies, instead of being cute, drive you nuts.

The symptoms of this stage vary with every relationship, but if you think about your marriage, you will notice a dramatic difference between the initial stage when you were in love and a much duller or even angry subsequent stage.

At this point, you and/or your spouse might start asking, "Did I marry the right person?" And as you and your spouse reflect on the euphoria of the love you once had, you may begin to desire that experience with someone else. This is when marriages breakdown. People blame their spouse for their unhappiness and look outside their marriage for fulfillment.

Extramartial fulfillment comes in all shapes and

sizes. Infidelity is the most obvious. But sometimes people turn to work, church, a hobby, a friendship, excessive TV, or abusive substances.

But the answer to this dilemma does NOT lie outside your marriage. It lies within it.

I'm not saying that you couldn't fall in love with someone else. You could. And TEMPORARILY you'd feel better. But you'd be in the same situation a few years later. Because (listen carefully) THE KEY TO SUCCEEDING IN MARRIAGE IS NOT FINDING THE RIGHT PERSON; IT'S LEARNING TO LOVE THE PERSON YOU FOUND.

SUSTAINING love is not a passive or spontaneous experience. It'll NEVER just happen to you. You can't "find" LASTING love. You have to "make" it day in and day out. That's why we have the expression "the labor of love." Because it takes time, effort, and energy. And most importantly, it takes WISDOM. You have to know WHAT TO DO to make your marriage work.

Make no mistake about it. Love is NOT a mystery. There are specific things you can do (with or without your spouse) to succeed with your marriage.

Just as there are physical laws of the universe (such as gravity), there are also laws for relationships. Just as the right diet and exercise program makes you physically stronger, certain habits in your relationship WILL make your marriage stronger. It's a direct cause and

effect. If you know and apply the laws, the results are predictable - you can "make" love.

Marriage Fitness a step-by-step system for making and maintaining love in your marriage. And the program works for any marriage even if only one spouse does it.

So what's your first step?
[Sign up here.](#)

My husband wanted out and wouldn't go for help. So I did Marriage Fitness alone. Now he wants back in and we're doing the program together. Mort, you're the best.

EXPOSED: New Jersey Mom Makes \$8,000/Month And You Won't Believe How She Does It!

[Redacted] puts her computer to work and makes money while working from home. She says that [Home Jobs Revealed](#) has helped change her financial life and recommends it to people as a good opportunity.

Have You Ever Considered Working From Home Online?
[Redacted] from Piscataway Tel Aviv-yafo, NJ05 never thought that she would work online, until curiosity got the best of her and she ordered a course from Millionaire author [Redacted] called Home Jobs Revealed. Before she knew it, she discovered her secret to beating the recession, and being able to provide for her family while at home with her three children.

I heard about [Redacted] from a colleague last month and decided to feature her story in our weekly consumer report. In our phone interview she told me her amazing story. "I actually make a steady \$7,000-\$8,000 a month working from home online. It's enough to comfortably replace my old jobs income, especially

considering I only work about 15 hours a week from my own home online. It gives me so much time to spend with my family."

A check [Redacted] recently received using the Home Jobs Revealed System

Working online has been a financial windfall for [Redacted] who struggled for months to find a decent job but kept hitting dead ends. "I lost my job shortly after the recession hit, I needed reliable income, I was not interested in the "get rich quick" scams you see all over the internet. Those are all pyramid scams or stuff where you have to sell to your friends and family. I just needed a legitimate way to earn a living for me and my family. The best part of working online is that I am always home with the kids. Thanks to the Multipul Streams of Income Kit I am giving my kids the childhood they deserve."

I asked her about how she started her life-changing journey. "It was pretty easy", I saw an ad by [Redacted] about a course called Home Jobs Revealed. I knew about [Redacted] from TV and knew she was legit, and since they offered a "365 Day Money Back

[Redacted] is a regular mom who lost her job last year, and after an unsuccessful job hunt, she started working online. I interviewed her about her amazing story and she revealed her steps for success.

Step 1
Go to [Home Jobs Revealed](#), and fill out the form to get instant online access.

Step 2
Use the [Redacted] [Home Jobs Revealed Course](#) and follow the simple online instructions. You will begin earning revenue within minutes.

Guarantee - I figured I really had nothing to lose. so I invested in the course.

I got the course and within five weeks I had made over \$8,000!!! Its really simple, I am not a computer whiz, but I can use the internet. I follow [redacted] simple instruction. "I don't even have to sell anything and nobody has to buy anything from me". There are openings all over the country, you should try it."

The companies you work with are worth over 100 billion dollars and are the most used sites in the internet market place, like Amazon, Google, Walmart, Delta, Apple and more... You're using the top ranked sites in the world, over 50 percent of all internet traffic flows through them everyday. It's a great opportunity and this has been helping people work at home online for over 5 years. Why not get in with the internet's best and biggest companies?

There are plenty of scams on the internet claiming you can make \$50,000 a month, but that is exactly what they are, scams. This kit, however, is not definately not one of those! From my conversation with Melissa, "I am making a good salary from home online, which is amazing, under a year ago I was jobless in a horrible economy. Today I make about \$80/Hr and I don't even have to leave the house. I thank God every day that I filled out that form and got my kit just minutes later."

Quickly, [redacted] was able to use the simple [redacted] [Home Jobs Revealed](#) to make it out of the recession.

"I went from a fixed salary at work to grossing an additional \$7,000-\$8,000 a month from my home computer."

[redacted]

[redacted] had never shared her story before, this is the first time she's going public

If you would like to take advantage of the same opportunity as [redacted]. Here's how to get started:

Step 1

Go to [redacted] [Home Jobs Revealed](#), and fill out the form to get instant online access to the program.

Step 2

Use the [redacted] [Home Jobs Revealed Course](#) and follow the simple online instructions. You will begin earning revenue within minutes.

Step 3

EXPOSED: New Jersey Mom Makes \$8,000/Month And You Won't Believe How She Does It!

[Redacted] puts her computer to work and makes money while working from home. She says that Home Jobs Revealed has helped change her financial life and recommends it to people as a good opportunity.

Have You Ever Considered Working From Home Online?
[Redacted] from Piscataway Tel Aviv-yafo, NJ05 never thought that she would work online, until curiosity got the best of her and she ordered a course from Millionaire author [Redacted] called Home Jobs Revealed. Before she knew it, she discovered her secret to beating the recession, and being able to provide for her family while at home with her three children.

I heard about [Redacted] from a colleague last month and decided to feature her story in our weekly consumer report. In our phone interview she told me her amazing story. "I actually make a steady \$7,000-\$8,000 a month working from home online. It's enough to comfortably replace my old jobs income, especially

considering I only work about 15 hours a week from my own home online. It gives me so much time to spend with my family."

A check [Redacted] recently received using the Home Jobs Revealed System

Working online has been a financial windfall for [Redacted], who struggled for months to find a decent job but kept hitting dead ends. "I lost my job shortly after the recession hit, I needed reliable income, I was not interested in the "get rich quick" scams you see all over the internet. Those are all pyramid scams or stuff where you have to sell to your friends and family. I just needed a legitimate way to earn a living for me and my family. The best part of working online is that I am always home with the kids. Thanks to the Multipul Streams of Income Kit I am giving my kids the childhood they deserve."

I asked her about how she started her life-changing journey. "It was pretty easy", I saw an ad by [Redacted] about a course called Home Jobs Revealed. I knew about [Redacted] from TV and knew she was legit, and since they offered a "365 Day Money Back

[Redacted] is a regular mom who lost her job last year, and after an unsuccessful job hunt, she started working online. I interviewed her about her amazing story and she revealed her steps for success.

Step 1
Go to [Home Jobs Revealed](#), and fill out the form to get instant online access.

Step 2
Use the [Redacted] [Home Jobs Revealed Course](#) and follow the simple online instructions. You will begin earning revenue within minutes.

Guarantee - I figured I really had nothing to lose. so I invested in the course.

I got the course and within five weeks I had made over \$8,000!!! Its really simple, I am not a computer whiz, but I can use the internet. I follow [redacted] simple instruction. "I don't even have to sell anything and nobody has to buy anything from me". There are openings all over the country, you should try it."

The companies you work with are worth over 100 billion dollars and are the most used sites in the internet market place, like Amazon, Google, Walmart, Delta, Apple and more... You're using the top ranked sites in the world, over 50 percent of all internet traffic flows through them everyday. It's a great opportunity and this has been helping people work at home online for over 5 years. Why not get in with the internet's best and biggest companies?

There are plenty of scams on the internet claiming you can make \$50,000 a month, but that is exactly what they are, scams. This kit, however, is not definately not one of those! From my conversation with Melissa, "I am making a good salary from home online, which is amazing, under a year ago I was jobless in a horrible economy. Today I make about \$80/Hr and I don't even have to leave the house. I thank God every day that I filled out that form and got my kit just minutes later."

Quickly, [redacted] was able to use the simple [redacted] [Home Jobs Revealed](#) to make it out of the recession.

"I went from a fixed salary at work to grossing an additional \$7,000-\$8,000 a month from my home computer."

[redacted]

[redacted] had never shared her story before, this is the first time she's going public

If you would like to take advantage of the same opportunity as [redacted]. Here's how to get started:

Step 1

Go to [redacted] [Home Jobs Revealed](#), and fill out the form to get instant online access to the program.

Step 2

Use the [redacted] [Home Jobs Revealed Course](#) and follow the simple online instructions. You will begin earning revenue within minutes.

Step 3

Deposit your Earnings by check or direct bank transfer, they pay every week. (Making money has never been so easy. Get ready for your life to change.)

Copyright Tips

What is copyright? Copyright is a form of protection provided for original works of authorship, including literary, dramatic, musical, graphic and audiovisual creations. "Copyright" literally means the right to copy, but has come to mean that body of exclusive rights granted by law to copyright owners for protection of their work.

What is copyright infringement? Copyright infringement occurs when a copyrighted work is reproduced, distributed, performed, publicly displayed, or made into a derivative work without the permission of the copyright owner.

Posting copyright-infringing content can lead to the termination of your account, and possibly monetary damages if a copyright owner decides to take legal action (this is serious—you can get sued!). Below are some guidelines to help you determine whether your photo text or video is eligible or whether it infringes someone else's copyright.

As a general matter, we at Jerk respect the rights of artists and creators, and hope you will work with us to keep our community a creative, legal and positive experience for everyone, including artists and creators.

Copyright Infringement Notification

To file a copyright infringement notification with us, you will need to send a written communication that includes substantially the following (please consult your legal counsel or see Section 512(c)(3) of the Digital Millennium Copyright Act to confirm these requirements):

- i. A physical or electronic signature of a person authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.
- ii. Identification of the copyrighted work claimed to have been infringed, or, if multiple copyrighted works at a single online site are covered by a single notification, a representative list of such works at that site.
- iii. Identification of the material that is claimed to be infringing or to be the subject of infringing activity and that is to be removed or access to which is to be disabled, and information reasonably sufficient to permit the service provider to locate the material. Providing URLs in the body of an email is the best way to help us locate content quickly.
- iv. Information reasonably sufficient to permit the service provider to contact the complaining party, such as an address, telephone number, and, if available, an electronic mail address at which the complaining party may be contacted.
- v. A statement that the complaining party has a good faith belief that use of the material in the manner complained of is not authorized by the copyright owner, its agent, or the law.
- vi. A statement that the information in the notification is accurate, and under penalty of perjury, that the complaining party is authorized to act on behalf of the owner of an exclusive right that is allegedly infringed.

To expedite our ability to process your request, such written notice should be sent to our designated agent via our online copyright complaint form below. You will need a Jerk account in order to utilize this tool.

2. I have authority to certify the authenticity and accuracy of the records provided to the Federal Trade Commission and attached hereto. Those records include PS Form 1093 for [REDACTED] in [REDACTED]
3. The documents provided by the United States Postal Inspection Service, and identified in Paragraph 2, are originals or true copies of records of regularly conducted activity that:
 - a) Were made at or near the time of the occurrence of the matters set forth by, or from information transmitted by, a person with knowledge of those matters;

2 it. Another proposed method of adding content to Jerk.com was encouraging people to sign up
3 and grant Jerk.com permission to access their Facebook Friends list, which would enable us to
4 export photos and other information from Facebook to Jerk.com. A third idea, championed by
5 software engineers from a Romanian firm called Software Assist, was that we generate profiles
6 on Jerk.com by bulk-loading user information from Facebook. They suggested that we access
7 Facebook's application programming interface ("API") and export user data to Jerk.com. I found
8 this last approach to be the least useful to end-users. I saw some of Software Assist's code for the
9 Facebook interface and believe it was incorrectly storing information for longer than the
10 Facebook guidelines allowed. I do not know if this aspect of the code was a programming error,
11 intentional, or a healthy mixture of both.

12 6. Mr. Fanning also envisioned having a Jerk.com application on the Facebook
13 platform. I created the source shell of Jerk.com's Facebook application, but do not know how it
14 was ultimately implemented. I intended the application to bring Jerk.com content back to
15 Facebook, and for direct user interaction with Jerk.com content within Facebook, but other
16 engineers could easily have changed the code so that content flowed without direct user
17 interaction from Facebook to Jerk.

18 7. In December 2009, John Fanning and I flew from Boston to San Francisco to

22 8. During my time at Jerk.com, the website was not popular and had little user-
23 generated content. Most of the profiles were bulk loaded from Facebook. I have not been
24 involved with Jerk.com for several years.

25 9. I declare under penalty of perjury that the foregoing is true and correct.

5. I have not testified as an expert at trial or by deposition within the preceding four years.

6. Based upon my professional training, knowledge, and experience, I am qualified as an expert in statistics and data analysis.

OVERVIEW AND SUMMARY OF OPINIONS

7. I generated a random sample of profile pages on jerk.com. Each profile was a webpage devoted to a particular individual. I then collected data on this sample of profiles as they appeared on the jerk.com website in November of 2012. Based on the sample, I estimated the number of profiles on jerk.com, the number of profiles on jerk.com that contained a photo of a real person, and the number of profiles on jerk.com containing a photo of a child under the age of 10, and the number of profiles on jerk.com containing any "jerk" or "not a jerk" votes. I quantified the amount of statistical precision in my estimates by using confidence intervals.

8. I estimate that, in November 2012, 77.5 million jerk.com profiles were on the internet. Based on the amount of statistical precision in this estimate, there is a 95% chance that that the number of jerk.com profiles on the internet was between 73.1 million and 81.5 million.

9. I estimate that, in November 2012, 29.0 million jerk.com profiles, which was about 37.4% of all jerk.com profiles, contained a photo of a person. Based on the amount of statistical precision in this estimate, there is a 95% chance that the number of jerk.com profiles containing a photo of a person was between 24.6 million and 33.7 million.

10. I estimate that, in November 2012, 4.75 million jerk.com profiles, which was about 6.1% of all jerk.com profiles, contained a photo of a child under 10. Based on the amount of statistical precision in this estimate, there is a 95% chance that the number of jerk.com profiles containing a photo of a child under 10 was between 2.9 million and 7.3 million.

11. I estimate that, in November 2012, 0.5 million jerk.com profiles, which was about 0.64% of all jerk.com profiles, contained any votes. Based on the amount of statistical precision in this estimate, there is a 95% chance that the number of jerk.com profiles containing any votes was between 60,000 and 1.8 million.

ASSIGNMENT

12. During November 2012, I was assigned to the investigation of Jerk, LLC.
13. At that time, Complaint Counsel requested that I attempt to:
 - a) obtain and analyze a random sample of profiles that appear on jerk.com; and
 - b) estimate the total number of profiles that appear on jerk.com.

METHODOLOGY AND ASSUMPTIONS

14. Sampling is a basic and widely used tool in statistics. The most common purpose of sampling is to use the sample to infer something about a broader population. The sampling I performed for this matter is a straightforward application of using a sample to learn something about an overall population. Since it was not feasible to review all the jerk.com profile pages, I instead obtained and then reviewed a sample of profile pages. Using basic formulas from statistics, one can make precise statements about the population of all jerk.com profile pages based on the results from such a sample. To use these basic formulas from statistics, the sample must be composed of randomly selected observations from the overall population. Such a sample is called a random sample.

15. Construction of random sample: The first step in constructing a random sample is to specify the population of interest. In this case, we are interested in the population of all jerk.com profile pages. However, I did not have access to a list of the population of all the jerk.com profile pages from which to draw a sample. Therefore, I constructed the random sample based on a key feature of the jerk.com profile pages that I observed, which allowed me to specify the population. I observed that each jerk.com profile page had an 8-digit number within its internet webpage address (“URL”). Under the assumption that all jerk.com profile pages have a unique 8-digit identifier, the population of all jerk.com profile pages is simply the set of URLs formed by all the possible 8-digit numbers (from 00000000 to 99999999).

I initially generated a list of 300 random 8-digit numbers, because I hoped that visiting 300 links would provide at least 100 profile pages in the sample that contained a photo of a person on jerk.com. A sample with at least 100 such profile pages would be large enough to produce informative estimates of the number of profiles containing a photo of a person on the jerk.com website, and to describe the common characteristics of those pages. After visiting 300 links, there were only 83 profile pages in the sample that contained a photo of an actual person. I then decided to visit 100 additional links in hopes of adding about 20 more profiles with a photo of a person to the sample. After visiting the 100 additional links, the final sample of 400 links contained 116 profile pages with a photo of a person.

To generate the 400 random 8-digit numbers, I used the `runiform()` function in the commonly used statistical software program STATA. A random number function such as `runiform()` can be thought of as an infinite list of numbers in random order. The user of the program must tell the software where to start in the infinite list by specifying a random number seed (the seed is just another number). I used the digits from the serial number on a dollar bill pulled from my wallet as the random number seed.

16. Limitations of random sample: The sample I constructed is relevant for drawing inferences about the population of jerk.com profile pages with 8-digit identifiers in the URL in the following format: [http://www.jerk.com/profile.php?id=\[8-digit number\]](http://www.jerk.com/profile.php?id=[8-digit number]). If there are other jerk.com profile pages that do not have the 8-digit URL format above, the sample I constructed is not representative of those profiles. During the course of our investigation, I never saw profiles without the 8-digit URL format. In addition, it is possible that within the population of jerk.com profiles with the 8-digit URL format, the 8-digit URL links are not unique. If the links were not unique, one link would be associated with more than one profile page, or the same profile page could be accessed by different links. In the review of the sample, I did not see any instances of non-uniqueness. I also attempted to assess non-uniqueness informally by clicking on the same profile URL more than one time and checking whether the same profile page appeared.

17. Estimates: The estimates of the number of jerk.com profile pages on the internet, and the number of profile pages with certain characteristics, are based on extrapolating the proportions that I calculated from the sample to the overall population. For example, I calculated that 0.775 (or equivalently 77.5%) of the 400 8-digit URL links in the sample existed as a profile page on jerk.com (310 out of 400). To extrapolate the 77.5% figure to the population, I simply computed 77.5% of the size of the population (multiplying 99,999,999 by 0.775). This calculation relies on a basic result in statistics that the proportion in a random sample represents the best guess of what the proportion is in the overall population.

18. Confidence interval: A confidence interval is a range of values that is centered on the estimate from the sample. The confidence interval is a commonly used method for quantifying the amount of statistical precision in an estimate by telling us the range of values in the population that are consistent with the estimate from the sample. By convention, in practical applications it is common to use 95% confidence intervals. The 95% confidence interval is designed, using some formulas from statistics, so that it has a 95% chance to include the true value in the overall population. For example, the 95% confidence interval for the estimate that a jerk.com profile exists for 0.775 of all potential 8-digit URLs begins at 0.731 and ends at 0.815. Therefore, there is a 95% chance that the interval [0.731 , 0.815] covers the true proportion of all potential 8-digit URL links that existed as a jerk.com profile page. There are several confidence intervals available for binomial random variables (which take on only two values, either 1 or 0) such as those in question here. For example, a profile either contains a photo of a person (coded as 1), or it does not (coded as 0). I used the “exact” confidence interval (sometimes called the Clopper-Pearson (1934) interval). As a check, I also computed confidence intervals using a re-sampling procedure called the bootstrap. Those intervals were very similar to the exact confidence intervals but I do not include them in this report.

COLLECTING THE RANDOM SAMPLE OF JERK PROFILES

19. Based upon the methodology I described above, I generated a list of 400 random 8-digit numbers.

20. I created a Microsoft Excel spreadsheet and added those numbers to the end of the following Internet webpage address (“URL”): [http://www.jerk.com/profile.php?id=\[insert number\]](http://www.jerk.com/profile.php?id=[insert number]). By doing so, I created potentially 400 unique URLs on jerk.com.

21. I provided the Excel spreadsheet of profile links to research analysts working for the FTC's Bureau of Economics. I instructed the research analysts to record what appeared on their computer screens when they clicked on the URLs contained in the spreadsheet. To record their screens, they used a computer software program called Camtasia, which digitally records a video of any action that appears on a computer screen and saves the recording electronically. The program also allows the user to convert the video, once created, to a common format, such as a windows media video ("wmv") file. Under my supervision, the research assistants recorded and then saved what appeared on their computer screens when they clicked on the URLs contained in the spreadsheet. They saved the initial Camtasia recordings and then converted them immediately to wmv files. These wmv files were saved to CDs and stored in my office. Based upon my instructions, the following eight video files were created between November 26, 2012, and November 29, 2012:

- a) jerk_1-50.wmv
- b) jerk_51-100.wmv
- c) profiles_101_150.wmv
- d) jerk_151-200.wmv
- e) jerk_201-250.wmv
- f) profiles_251_300.wmv
- g) jerk_301-400.wmv

22. Under my supervision, the research assistants then entered information about the sampled profiles into Microsoft Excel spreadsheets. For each profile link clicked, the research analysts first entered a "Y" in when the profile existed on jerk.com, or an "N" if the profile did not. In similar fashion, the research analysts kept track of the following for each profile link clicked:

- a) Whether a photo of a person was present
- b) Whether a photo of a child who appeared less than 10 years old was present
- c) Whether the profile had any votes
- d) Other categories kept track of but not covered in this report: person's age listed in profile, email address in profile, whether the profile appeared in a google search, whether the profile contained "disturbing" content (violent or pornographic), whether the "content option" was enabled on the profile, and whether adults also appeared in a photo of a child under 10 years old.

23. I used the statistical software program STATA to create a data file for the entire sample of 400 profiles reflecting the information contained in the spreadsheets that the research analysts created, as described in Paragraph 22 above.

ANALYSIS OF THE SAMPLE

24. I found that 310 out of the sample 400 profile URLs linked to the URL of a jerk.com profile.

25. Of the 310 jerk.com profiles,

- a) 116 were linked to a profile containing a photo of a person. Profiles that contained an image of a cartoon character resembling a character from the TV show “South Park” were not counted as a photo of a person.
- b) 19 were linked to a profile containing a photo of a child who appeared to be younger than 10 (as coded by our RAs). I asked the RAs to code only children under 10 because the assessment of a child’s age from a photo is a subjective exercise that is more difficult for teenagers. Marking only those instances where the child appears 10 or younger is a conservative count of the number of instances where children, meaning persons younger than 18 years of age, appeared.
- c) only 2 had any votes.

26. I calculated the proportions in the sample for each of the findings above, and the 95% confidence intervals for each proportion. As explained in Paragraph 17, I used the proportions found in the sample to estimate the number of profiles appearing on the jerk.com website with the given characteristics (appear online, contain a person photo, etc.). As explained in Paragraph 18, I used the confidence intervals to calculate a range that has a 95% chance to cover the true number of jerk.com profiles on the internet with the given characteristics.

- a) 77.5% of the 400 8-digit URL links linked to a profile that existed on jerk.com. This translates to 77.5 million profiles on jerk.com in November 2012. The 95% confidence interval for the percent of potential profiles that exist on the jerk.com website is 73.1% to 81.5%. Those percentages translate to a lower bound of 73.1 million and an upper bound of 81.5 million total profiles on jerk.com in November 2012.
- b) 29.0% of the 400 8-digit URL links linked to a profile on jerk.com that contained a photo of a person. This translates to 29.0 million profiles with a photo of a person on jerk.com in November 2012. The 95% confidence interval for the percent of potential profiles that contain a photo of a person is 24.6% to 33.7%. Those percentages translate to a lower bound of 24.6 million and an upper bound of 33.7 million total such profiles on jerk.com in November 2012.
- c) 4.75% of the 400 8-digit URL links linked to a profile on jerk.com that contained a photo of a person appearing to be under 10 years of age. This translates to 4.75 million profiles with a photo of a person under 10 years of age on jerk.com in November 2012. The 95% confidence interval for the percent of potential profiles that contain a photo of a person under 10 years of

age is 2.9% to 7.3%. Those percentages translate to a lower bound of 2.9 million and an upper bound of 7.3 million total such profiles on jerk.com in November 2012.

- d) 0.5% of the 400 8-digit URL links linked to a profile on jerk.com that contained any votes. This translates to 0.5 million profiles with any votes on jerk.com in November 2012. The 95% confidence interval for the percent of potential profiles that contain any votes is 0.06% to 1.8%. Those percentages translate to a lower bound of 60,000 and an upper bound of 1.8 million such profiles on jerk.com in November 2012.
